

Science teachers are encouraged to apply-

Great news! Hurry to apply!

July 12-24th 2010, a two-week program of study at Austin Peay State University is offered for science teachers wishing to be prepared to teach physics, physical world concepts (PWC), or physical science. Mathematics teachers may also apply. The objective is to review physics concepts and problem-solving in preparation for the physics PRAXIS. This program is team-taught by physics and mathematics faculty with high school teaching backgrounds, and is algebra-based. We are pleased to offer this with a second year of funding from the Tennessee Higher Education Commission, which recognizes the importance of STEM education.

Lodging on campus is provided as teachers from across the state are invited to participate, and upon completion, participants will receive a stipend of \$750.

The participants who qualify will also receive a scholarship for graduate credit (3 cr.) from Austin Peay.

Registration for the Physics PRAXIS will be paid and teachers will take the PRAXIS in Physics during the program and pursue the physics endorsement to the science teacher license. Limit: 24 participants.
